Results Software Release Notes

Our New Presentation Engine (beta)

The Results Management System™ and Results Software™ | The Power to Improve
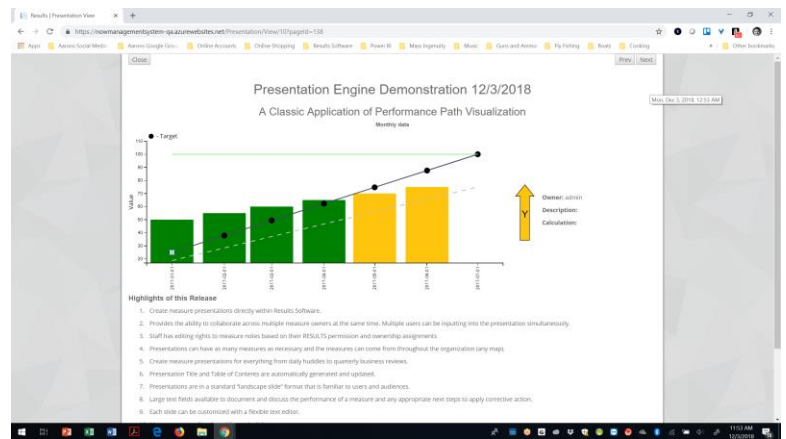

Announcing a New Results Software Presentation Engine

We are excited to share with you our latest major upgrade to Results Software. On Thursday, December 13th a brand new "Results Presentation Engine" will be released as part of the standard feature set. We chose to develop Presentation Engine as a direct result of your feedback. This feature will give you the capability to create your performance measure presentations directly in Results Software. It is designed with the goal of significantly reducing the time and headache involved in putting together the documentation for measure review meetings. More about the specifics in the highlight section below.

Why We Chose a beta Release

This first release of Presentation Engine can be described as a beta release. We chose to do a beta release because this is just the beginning of a powerful new capability and we didn't want you to have to wait any longer. The release is functional, stable, and ready for you to use right away. Plus, we have an exciting development road map (outlined below) for Presentation Engine that will bring many enhancements over time. Of course, we will be actively collecting your feedback from this first release to further refine the capability.

Highlights of this Release

The following is a partial list of the key features of Presentation Engine:
1. Create measure presentations directly within Results Software.
2. Provides the ability to collaborate across multiple measure owners at the same time. Multiple users can be inputting into the presentation simultaneously.
3. Staff has editing rights to measure notes based on their RESULTS permission and ownership assignments
4. Presentations can have as many measures as necessary and the measures can come from throughout the organization (any map).
5. Create measure presentations for everything from daily huddles to quarterly business reviews.
6. Presentation Title and Table of Contents are automatically generated and updated.
7. Presentations are in a standard "landscape slide" format that is familiar to users and audiences.

---

8. Large text fields available to document and discuss the performance of a measure and any appropriate next steps to apply corrective action.
9. Each slide can be customized with a flexible text editor.
10. Measures are easily selected for each slide.
11. Presentations can be locked down (e.g., "frozen in time") to maintain proper history and archiving.
12. Presentations can be named and saved for future reference. Historical narrative on past reviews easily retrievable.
13. Presentations can be navigated with simple directional controls.
14. There is no limit to the number of presentations that can be created.

Our Go Forward Road Map for Presentation Engine

We have an exciting road map of new features for Presentation Engine and we anticipate many more ideas from all of you. Here are a few of the new features we will be rolling out over time:

1. Saving presentations to PDF format (for saving outside of Results Software as well as ease of printing).
2. Advanced formatting and branding.
3. Graphics importing.
4. Multiple measures per slide.
5. Multiple template choices.
6. User designed templates.

Our Ask of You

Our ask of you is simple. Please start using Presentation Engine and experiment with the power of preparing for your meetings within Results Software. You will have lots of feedback and we will want to hear it. That way we can formulate a road map for new features based on "your voice."

Please reach out to Chris Barker (cbarker@massingenuity.com**), Results Software Product Manager to schedule a private training session.**
