

# Results Software™ Release Notes

**June 2020**  
**Inactive Maps**  
**Secondary Performance Path**

## The Results Management System™ and Software Enterprise Performance Management

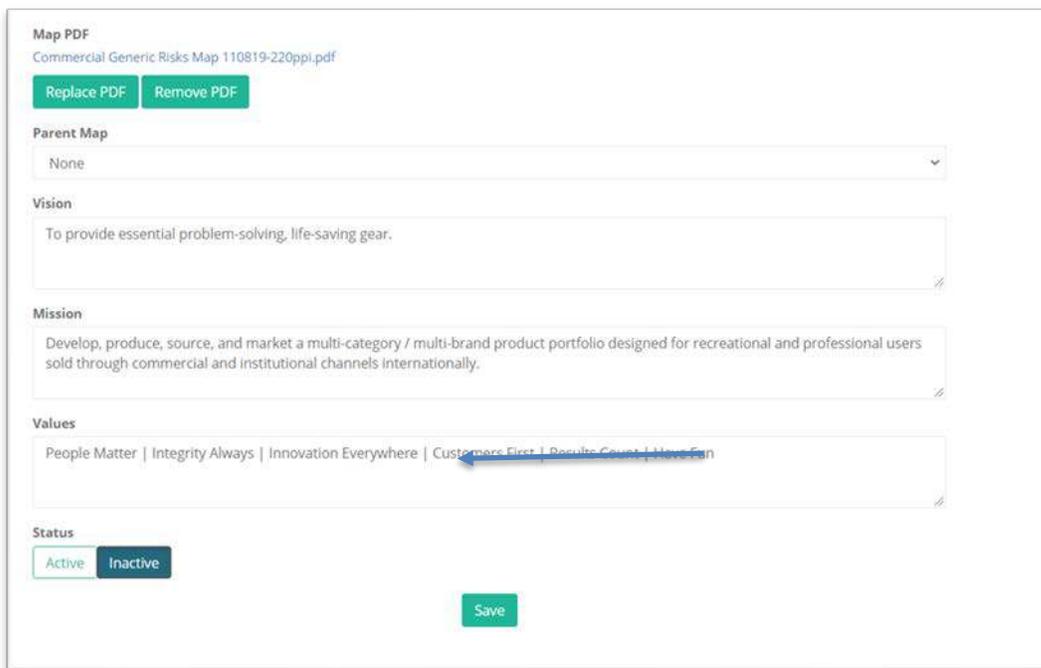

June 2020

## Announcing our June Release

We are excited to share with you our latest development work in support of Results Software.

### Inactive Maps

We deployed some enhancements to how inactive maps are handled. The first adjustment was rethinking the starting point of maps. When a map is first created, it will now be set to “active” vs the current rule of “inactive.” Our clients have found it helpful to share the development of maps and measures to their organization. From day one, your Results users can be current on the latest new maps and measures as they get built.

The screenshot shows a web interface for managing a map PDF. At the top, it displays the title 'Map PDF' and the filename 'Commercial Generic Risks Map 110819-220ppi.pdf'. Below this are two buttons: 'Replace PDF' and 'Remove PDF'. The 'Parent Map' section has a dropdown menu currently set to 'None'. The 'Vision' section contains the text 'To provide essential problem-solving, life-saving gear.' The 'Mission' section contains the text 'Develop, produce, source, and market a multi-category / multi-brand product portfolio designed for recreational and professional users sold through commercial and institutional channels internationally.' The 'Values' section contains the text 'People Matter | Integrity Always | Innovation Everywhere | Customers First | Results Count | Have Fun'. At the bottom, there is a 'Status' section with two buttons: 'Active' and 'Inactive', where 'Inactive' is currently selected. A 'Save' button is located at the bottom center of the form.

Figure 1: Under Manage Maps/Edit/Select Inactive to retire an old map.

June 2020

If the map, you wish to retire has active measures, you will be asked to make them inactive before proceeding.

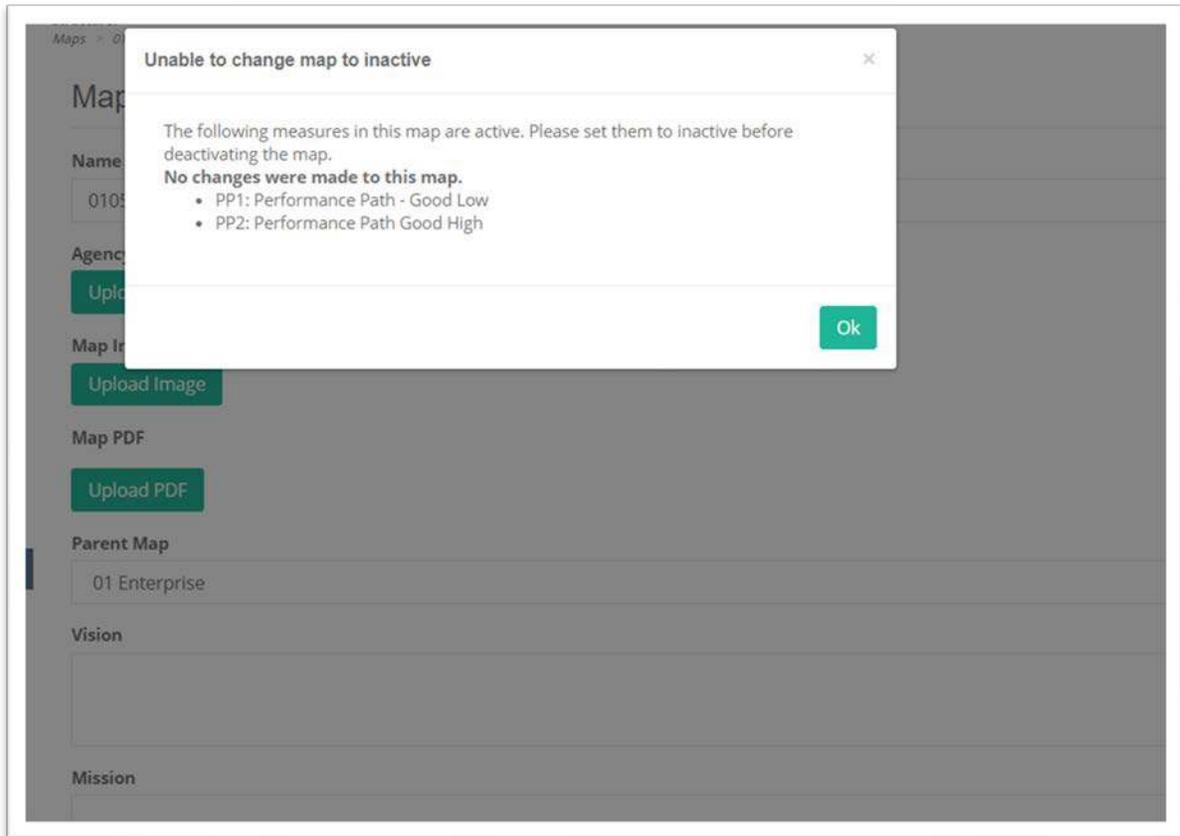

Figure 2: You must flip your active measures to inactive before you can proceed.

The inactive symbol will not appear in the list of maps under Manage Maps.

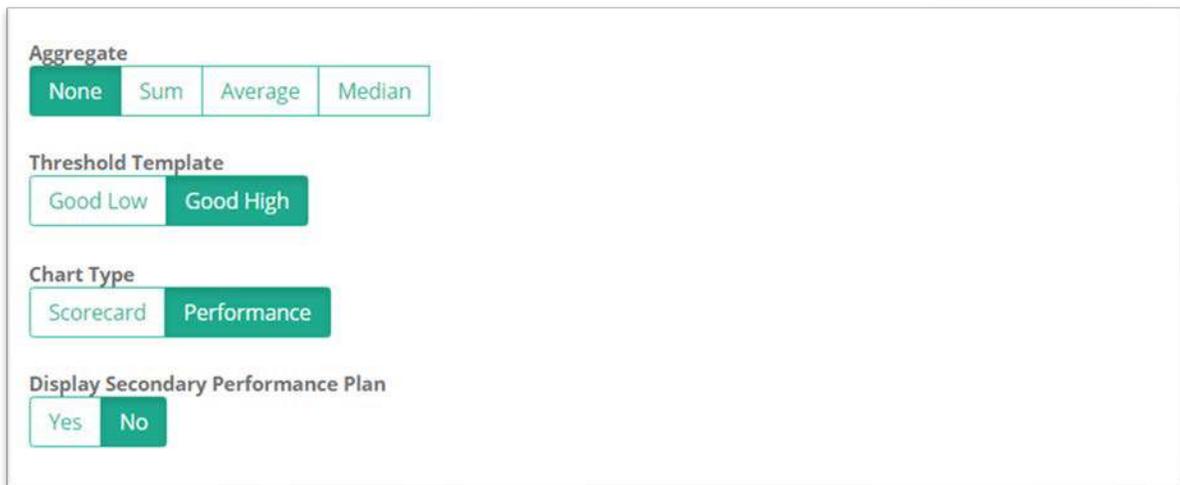

Figure 3: You now have quick visibility on which maps are active.

June 2020

## Performance Path Enhancement

Due to client interest, we have added the ability to plot a secondary performance path under the performance path functionality. Often the path of improvement gets extended for time or adjusted to a new target. It is helpful to see in one visual how that forecasting has adjusted over time. This is an optional feature that can be turned on for performance plan charting.

Under edit measure, first select display secondary performance path.

The screenshot shows a settings panel with four sections:

- Aggregate:** Buttons for None, Sum, Average, and Median. 'None' is selected.
- Threshold Template:** Buttons for Good Low and Good High. 'Good High' is selected.
- Chart Type:** Buttons for Scorecard and Performance. 'Performance' is selected.
- Display Secondary Performance Plan:** Buttons for Yes and No. 'No' is selected.

Figure 4: Select Yes for Display Secondary Performance Path

Second, set up an additional performance path. Note the secondary performance path must start on the same day or later date than the active plan. It can also not extend past the active plan.

The screenshot shows the 'Performance Plans' interface with an 'Add Performance Plan' form and a table of existing plans.

Name	Start Date	Finish Date	Initial Value	FY Target	JOP	Threshold	Active	Edit	Delete
2020	1/1/2017	1/1/2021	1.2	4	0	85	Active	Edit	Delete
2020 Revised	1/1/2017	1/1/2021	1.2	7	0	85		Edit	Delete

Figure 5: A secondary path is set up with the same dates but a higher future year target value.

June 2020

Figure 6: In this example the values of the path are adjusted. The active plan is in black and the secondary/inactive path is in grey.

Both performance plans are plotted, and you can hover over the target points to display the actual values. The active plan will show up in black with the secondary one in grey.

### Getting help

If you are interested in having a webinar training on this new functionality for yourself or your power users, please reach out to **Chris Barker** ([cbarker@massingenuity.com](mailto:cbarker@massingenuity.com)), Results Software Product Manager to schedule. Please also feel free to call Chris at 971-409-6680 with any questions you may have.
